

**Assembléon's A-Series pick & place solutions; best performance available**

True Capacity on Demand is based around our successful A-Series pick & place platform. These machines are characterized by the highest yield and best placement quality in the PCB assembly industry. They enable fast product changeover and require few operators. Specially designed with a small footprint to save valuable floor space, they have minimal maintenance requirements and are backed by our comprehensive global service and training program.

**Leading in 'green'**

With our A-Series machines you don't just get the best performance; you also benefit from the lowest energy and air consumption in the industry. This leads to lower bills, reduced CO<sub>2</sub> and smaller carbon footprint. The additional robot heads supplied through the True Capacity on Demand program are stored and refurbished at various local sites to minimize transport requirements.

## SAVE MONEY

### Financial Flexibility

- Save more than 20% on initial equipment investment
- Optimize your fixed costs
- Extra investment is only necessary when demand temporarily increases
- No maintenance costs on the additional robot heads

## SAVE TIME

### Rapid response

- Delivery of ultra-compact robot heads within a week
- Fast return to original configuration after rental period

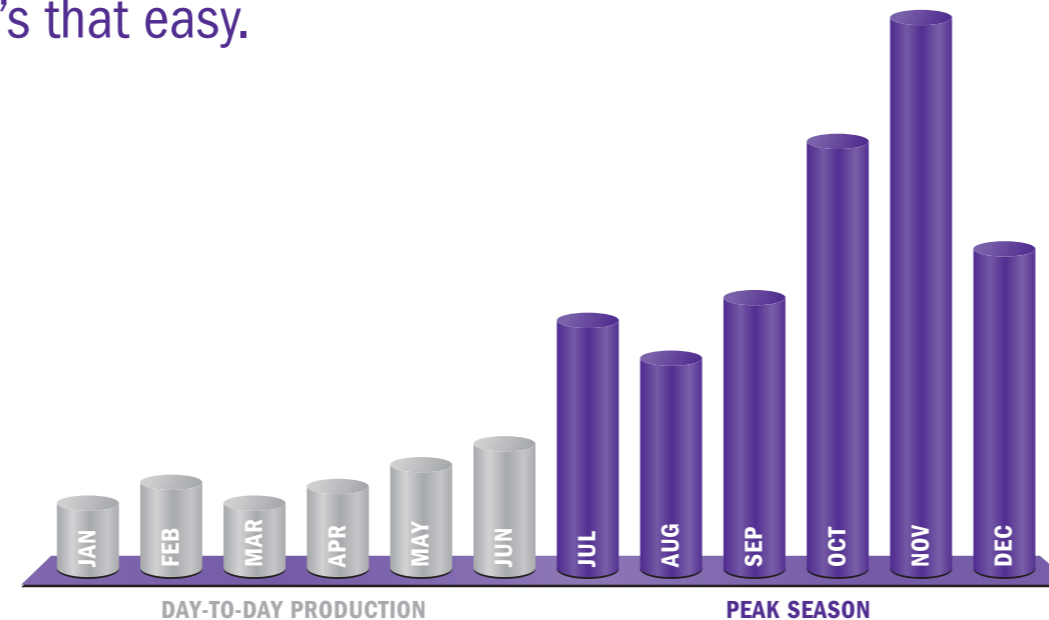

## SAVE SPACE

### Business as usual

- Installation is fast and straightforward
- No disruption of existing production lines
- Increased output has no impact on placement quality or yield

Buy sufficient equipment for day-to-day production, then hire extra capacity during peaks in demand. It's that easy.

Use your normal setup on the Assembléon's A-Series solution to manage your day-to-day production. When demand increases, simply hire additional ultra compact robot heads for a temporary boost in production on the same machine.

**Saving you money, time and space!**

- Do you have the feeling you invested too much or too little in equipment?
- Are you able to react quickly enough to changing market dynamics?
- Would you prefer to leave your existing line layout untouched?

Assembléon's True Capacity on Demand is a simple way of giving you real flexibility in your production capacity. You can save up to 20% on your initial equipment investment by installing the appropriate number of our A-Series pick & place machines to precisely match your base loading.

Then, when you experience increases in demand, simply hire additional robot heads - that don't require any additional space on your line - so you can increase your output. When the peak period is over, we take the robot heads back. In that way your manufacturing capacity always matches demand.

To find out exactly how Assembléon's True Capacity on Demand program can help improve your business, please contact our nearest Assembléon office or go to [www.assembleon.com](http://www.assembleon.com).
